REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claimed burner arrangement comprising a combustion chamber and a flame tube with the feature of an intermediate outlet region arranged between the combustion chamber inlet and outlet regions along with an inlet region near the combustion chamber at which combustion products enter the flame tube is not found in the prior art either singly or in combination. This considered patentably distinct feature is found in the sole independent claim 1. The closest prior art references is considered Schlecht (US 6,811,395) in view of Mutchler (US 4,729,365) which teaches deflection exhaust gases around a combustion chamber with a floatingly supported combustion drum. Other prior art references cited in this action are considered to teach one more features of the claimed invention, but do not provide motivation to combine those references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 703 308 7570. The examiner can normally be reached on normal weekday business hours (east coast time).

Art Unit: 3749
